There is a sign that seems to indi-rate disappointments for army officers, wing to questions of rank or prece-fence in public affairs. Trouble connected with a canton-ment has been forcitoid. This may be a fire or heavy loss through some calamity that destroys valuable pro-cets.

Fitzgerald naturally gave this promes, and so his comparatively brief stay in the dungeon had the tesult of freeing him from imprisonment and restoring him to happiness. As poor Stöker had formed no remaints attachments and formed no remaints attachments hat would have justified a similar plea in his case, he had to go back to the rison in Asia Minor. He did this, however, in a genuinely sporting spirit that was worthy of the best traditions of the British navy.

The production of more and better live stock with less expensive feed and a greater profit to the producers has received considerable attention in nearly all counties. During 1917 the agents in the Northern and Western states assisted in the organization of 150 live stock breeders' associations to eliminate numerical ending the use of better sires, and 182 cow-testing associations to eliminate numerical leeding. Through these associations and those organized with the assistance of agents in previous years, 127,835 cows were under test, resulting in at least 8,734 cows being discarded as unprofitable. Primarily through these organizations 10,936 farmers were induced to adopt balanced rations for their herds, and the rotiowing number of head of registered stock were secured at suggestion or agents: Bulls, 2,957. Exhibition Sonora Supreme Phonograph

The Only \$1,000 Phonograph Ever Shown in Memphis

PUBLIC CONCERTS DAILY

WE EXTEND a most cordial invitation to everyone to attend these daily concerts, arranged during the exhibition of the Sonora Supreme Phonograph. This is the only \$1,000 Phonograph ever brought to Memphis. It is the highest development in phonographic art. It records the human touch with all its essential qualities.

In the thousand-dollar Sonora Supreme, the crowning idea of Stradivari, the master craftsman who won world recognition in producing violius, has been applied. The devices for rounding and amplifying sound are scientifically constructed of carefully selected woods.

The Sonora Supreme is a triumph of architecture. The straight severe lines of other phonographs have been artfully molded into designs of delightful beauty. Soft curves take the place of harsh verticals and horizontals. The sides of the cabinet are fashioned into delicate bulges, harmonious waves which have never before
